PUBLIC NOTICE: MARCH 12, 2020

Frontroom is aware the State of Emergency declared in Colorado and of the news for multiple positive cases of COVID-19 (Novel Coronavirus) being treated within the Denver metro. We understand the severity of the situation and the general concern regarding everyone’s health and wellness, which is why we will continue to monitor the situation.

We do not expect any disruptions in our day to day operations, but we want to assure everyone that we have prepared for such an event and worked with all members of our team to reinforce our safety standards, guidelines and procedures until more progress has been made. Such measures include an increase in sanitization frequency, employee wellness checks prior to each shift, and continuous monitoring of all facets of business to ensure a healthy and safe environment for all parties. Should our current situation change, we will communicate that in an effective and timely manner.

Frontroom is a public facility and we rely heavily on our guests, but we urge everyone to avoid public interaction if they suspect they may be experiencing symptoms of the virus to help mitigate the spread. The Centers for Disease Control along with The Colorado Department of Public Health and Environment advises these individuals to schedule an appointment with their doctor or go to the emergency if they feel this is necessary.

To help spread awareness and alleviate the strain on care providers, we encourage you to utilize and share the resources listed below:
